Highlights and Major Events in Fiscal Year 2003

Community Resource Center Building Concerns

The Department was not successful with obtaining funding for relocation or repairs at the CRC building with the 2003 session of the Iowa Legislature. The Department did contract with an architectural firm to complete simple floor plans, drawings of a possible new building, and cost estimates for construction. The request for funding will be resubmitted for consideration by the 2004 session of the Legislature.

The Department did continue to do work to improve the indoor air quality as much as possible with the financial resources available. Due to the lawsuit filed against the building owners, Community Resources Corporation, by several current and former employees, two additional studies were conducted of the building. The results of those studies confirmed that the conditions in the building had improved but that the causes of the problems still existed. The air sampling study done by the plaintiff's experts generally showed results that were improved from earlier testing and with indoor mold levels below the outdoor air levels.

Offenders in Prison

Since October of 2000 the number of offenders in Iowa Prisons committed from the Seventh Judicial District has decreased. In October 2000 there were 1081 offenders in prison from the 7th Judicial District and that number decreased to as low as 1001 but has risen again to 1064 on July 1, 2003. Over approximately a three-year time period the number of persons in prison from this District has decreased by 2% and over the same timeframe the entire prison population has increased by 7%. Although there are many factors that contribute to and affect this issue, it is indicative of the effort in this District to make wise use of the resources for incarceration and utilize alternatives whenever possible.

War in Iraq

Two department staff members were called to active duty as a result of the War in Iraq. Mike Taylor, Systems Administrator, was called active duty and has returned from duty. Teresa Anderson, Residential Officer, was called to active duty at a slightly later date and as of the end of the fiscal year was still on active duty.

Drug Court

The Drug Court program was implemented in Scott County with Federal Byrne grant funding from the Governor's Office of Drug Control Policy with matching funds from

two local foundations and Department funds. The Riverboat Development Authority also provided funding for equipment for the program. So far, the program appears to be working very well and has provided services to 36 offenders. 24 offenders are still in the program and 12 offenders have been revoked to prison for program violations. If the 24 offenders complete the program successfully it will not only represent 24 persons whose lives have been saved from substance abuse and further criminal behavior, but also a significant saving of funds that would have been spent to incarcerate those offenders. Drug Court participants are offenders that would likely be sent to prison if the Drug Court program did not exist.

CJAAC and Jail Overcrowding

CJAAC is an acronym for the Scott County Jail and Alternatives Advisory Committee which was established after the last failed bond referendum to assist and advise Scott County regarding jail overcrowding problems and alternatives to resolve the problem. Several Department staff have been active working with that group and the programming it has developed and supported. Also, Department staff in the Clinton office has met with officials in Clinton to assist with jail overcrowding problems in Clinton County.

ICON

ICON, an offender database information system, was implemented in August 2000. Improvements have been made continually on ICON, which has increased its value to this Department. The system is now used to process information for transfers between districts and for release from prison. This has helped reduce the flow of paperwork and made the processes timelier.

The state correctional institutions are now making more use of ICON which has improved this Department's access to offenders in prison and also allowed prison staff quick access to the information we have entered into ICON including the Presentence Investigation, case notes, and other information. ICON data is also being extracted and processed for use by the Justice Data Warehouse. This will make the statistical information available to not only corrections but also other authorized criminal justice and policy maker users. The Justice Data Warehouse staff has also been working to merge information from the Iowa Court Information System with ICON to improve the information available for overall criminal justice systems operation. The ICON information is also being made available for use by law enforcement on a test basis that allows a law enforcement officer in the field to find out the supervision status of an offender as part of a records check for wants and warrants. The occurrence of the inquiry will eventually generate a notice to the offender's probation/parole officer that the offender was stopped and questioned for further use by the probation/parole officer. In addition considerable work is being done on plans for modifications and improvements in ICON to be released for use in fiscal year 2004.

Key Statistical Information

The following information was obtained from the Criminal Justice Data Warehouse and ICON (Iowa Corrections Offender Network – offender database system used by District Departments and the Department of Corrections).

- **Restitution Collection:** The significance of victim restitution can never be emphasized enough. This is why the Department places a high premium on its collection. For FY 2003: \$503,987 was collected in Clerk of Courts offices in this District. This represents restitution collected from all offenders. This would appear to be a significant decrease but the data source, Judicial Data Warehouse, notes that data from prior fiscal years may have been overstated due to programming related issues.
- **Pretrial Release Investigations:** The Department completed 4,165 investigations of the 16,178 that were completed statewide. This represents a slight increase for this Department and a reduction of over 1000 for the entire state. Racial breakdown of those interviewed was: 64% of the offenders were white, 29% were black, and 6% were Latino/Hispanic. This compares with a statewide breakdown of 72%, 20%, and 6% respectively.
- **Presentence Investigations:** 915 investigations were completed by 7th District Department staff of the total 9,647 completed statewide. The District amount is an increase of 130 or 17% over Fiscal Year 2002.
- **Enrollment Fees** for probation and parole supervision were collected from offenders in the amount of \$194,919 (increase of \$11,906 or 7%) that offsets the public expense to supervise offenders.
- **Assessment and Reassessments:** 1,808 LSI assessment and reassessments were completed. The LSI (Level of Services Inventory) is an assessment tool used by Department staff to assess and classify offenders for the purposes of case planning and risk management. The higher score represent a higher risk and need for supervision and services. 566 Jessness assessments were completed. Jessness Inventory is another assessment tool used as part of case planning and supervision. 3,247 Iowa Risk Assessments and Reassessments were completed. The Iowa Risk Assessment is used to determine the appropriate level of supervision and for workload and staffing purposes.
- **Field Supervision Offenders:** 1,681 offenders were on active field supervision on pretrial, probation, or parole supervision as of June 30, 2003. This is an increase of 137 and represents a 9% increase in the past fiscal year. Statewide there were 26,043 offenders under supervision. The level of supervision classification of offenders is shown graphically in the following chart. The Department provides a different level of supervision to different offenders based upon the risk of that offender. The “None” level represents offenders under supervised Pretrial Release who are not classified with the same system as probation and parole offenders.

The supervision status of the offenders under supervision at the end of the fiscal year is shown below. Compact supervision is supervision transferred from another state to Iowa.

The following chart represents the reason for closure for field supervision closures during FY03:

- **Residential Supervision:** 153 offenders were residents of either the Work Release Center or Residential Corrections Facility as of June 30, 2003. The two facilities have a combined capacity of 145 and were over capacity by 8 offenders on that date. Statewide there were 1,435 residing in residential programs and the 7th District total represents 10.6% of the statewide total. The program breakdown of the 153 residents were: 41 on Work Release, 39 were in the OWI program, 53 as a condition of probation, and 20 were offenders placed by the Federal Bureau of Prisons.

The following graph represents the reason for the 454 residential closures that occurred in FY03.

- **Security Standards:** 9,725 breath tests for alcohol use were conducted on 814 offenders, mostly in residential programs. 4,517 urinalysis tests for drug usage were conducted on 1,298 offenders.

Board of Directors Summary of Meetings
