

The Residential Correctional Facility (RCF) Fact Sheet

The Residential Correctional Facility (RCF) is part of the Department of Correctional Services in the 7th Judicial District representing Scott/Clinton/Muscatine/Cedar and Jackson counties. The RCF is located at 1330 West 3rd street, Davenport Iowa.

The primary purpose for the Residential Corrections Facility is to provide structure and supportive services to persons who lack the self-discipline and skills to conduct themselves in a responsible, pro-social manner. Residents gain skills and learn responsibility both through involvement with internal counseling sessions and community social service, educational, and employment programs. A level system permits residents to demonstrate their growth in responsible behavior and newly acquired skills. Residents must demonstrate financial responsibility by maintaining gainful employment and by complying with all payment expectations, including the payment of RCF rent, restitution, court costs, attorney fees, fines, child support and similar responsibilities.

Starting on May 1, 2016 rent for probation/work release clients is \$18.00 per day. For OWI continuum clients rent is \$27.00 that also pays costs for 21 day treatment program they attend during the first part of their stay. Length of program is 26 weeks. If all goals are met could be reduced to 4 months.

The RCF is a minimum-security facility. Consequently, security is a major focus of the program in an attempt to protect public safety while holding residents accountable for their behavior. Residents are monitored when they are at the RCF and when they are involved in activities away from the RCF. Eye counts, monitoring while on furloughs or pass, employment, and substance abuse testing are a few elements of the RCF security process. The RCF now houses up to 68 male only clients that are on probation status, some state work release clients and male OWI clients.

Referrals

Presentence investigators, probation/parole officers, District and Associate Court Judges, DOC institutional case managers and the Community Placement Office at IMCC refer clients. All referrals are made to the Residential Manager or his designee who determines the appropriateness of the placement. The most frequent factors considered in making placements are:

1. History of any violence
2. Ability to secure and maintain employment
3. Connections to the local community
4. Willingness and capability to participate in treatment programs
5. Previous experience, if any, in residential programs
6. LSI-R risk score or Jesness strategy group

RCF Admissions

Probation residents are admitted to the Residential Corrections Facility upon order of the District Court or placed in the Residential as a modification of probation by the Probation Officer per the correctional continuum. Parolees are admitted either as a special condition of their parole status as determined by the referring probation/parole officer or as a condition imposed by the Board of Parole or Administrative Law Judge. OWI clients are generally placed through the coordination of the District Court and the Residential Manager; however, the Community Placement Manager at the Medical Classification Center (IMCC) may seek placement of some OWI clients. The Community Placement Manager at IMCC places Work Release residents through coordination with the Residential Manager or DOC institutional case managers enter the offender information in ICON transfer instances after the BOP approves work release.

RCF Level System

The level system is designed to explain program expectations to the resident, reward positive behavior, monitor resident progress and enhance program consistency. Level advancements are granted to the resident who demonstrates and maintains responsible behavior. Advancements are granted only when the resident has exhibited and maintained progress toward program expectations.

To ensure a fair method of awarding residents of the Residential Corrections Facility upward ability and increased rewards for responsible behavior and a fair method of reducing resident benefits for irresponsible behavior, the District Director shall establish a Level system consisting of a minimum of four levels and a transition phase based on a contingency systems that grants rewards to the resident for meeting RCF program expectations. Residents shall earn furloughs and time reduction for completion of the following objectives: employment or education program stability and performance; level of participation in sex abuse treatment groups, substance abuse treatment activities and other treatment programs and achievement of other correctional plan goals; money management; successful use of furloughs; cleanliness of personal living areas and other assigned areas.

Overview/General Expectations

Residents must complete both the minimum time and requirements specified by each level before being considered for level advancement. Work Release, parole and pre-institutional clients are subject to the same level system;

Residents must apply for level advancement. The level advancement request must be submitted to the appropriate counselor.

Counselors present level advancements at weekly counselor meetings. At that time, the counselor presents relevant information and makes a recommendation on the appropriateness of level advancements.

A resident must earn furlough privileges on a weekly basis by working a minimum of 30 hours and meeting minimum case-plan expectations.

RCF Counselors review the level system with residents during the intake process and review the process periodically throughout the resident's involvement in the program.

Curfew begins 10:00 pm nightly-ends at 6:00 am. Residents are accountable to the RCF staff 24-hours per day, seven days a week. Staff conducts periodic checks on all residents. They can not move from destination to destination while on furlough during curfew hours.

Persons who allow residents to stay at their place of residence must be aware of the monitoring of residents whereabouts. That is, RCF staff calls destinations at random times throughout the course of furloughs to verify the location of the resident. Consequently, the residence must have a functional internal line phone service-NO CELL PHONES. Furthermore, use of home computing systems must not interfere with the RCF staffs ability to conduct telephone checks.

Visitation hours are **Friday 7pm to 9pm and Saturday 7pm to 9pm** for residents on level 1 and level 2. No visits during their orientation week or Level 3 and 4. Once they are eligible for furloughs they may not have visitations. The resident must have an approved visitor list of not more than 10 visitors.

Employment: All resident must work no less than 30 hours per week. If unemployed or working less than 30 hours per week, residents must seek employment between 1 & 5.

Education: Residents who have not completed a high school education will attend GED classes. If testing indicates an ability to complete GED requirements within five months, a resident must complete prior to discharge.

Substance Abuse: If an evaluation indicates a substance abuse problem, the resident must attend AA/NA group meetings. If the evaluating staff member recommends treatment, the resident will complete all sessions before discharge.

RCF ORIENTATION - ONE WEEK

1) **Privileges:** None.

2) **Responsibilities:** To advance to Level I the resident must:

- Complete all orientation-writing assignments
