Highlights and Major Events in Fiscal Year 2005

Community Resource Center Building Concerns

During the 2004 session of the Iowa Legislature funding was approved for relocation or repairs related to the CRC building which houses the Department's Work Release Center and field and administrative offices. The appropriations legislation completed near the end of the session and signed later by the Governor provides funding for the relocation work as follows: for FY05 - \$3 million and for FY06 and FY07 - \$3.75 million each fiscal year.

The Department will begin again the process of locating a site for relocation. The site that was selected and was the basis for the funding request is no longer available for our use. A key consideration will be location since that affects accessibility by offenders and operational costs in many different ways.

Offenders in Prison

Since October of 2000 the number of offenders in Iowa Prisons committed from the Seventh Judicial District has decreased. In October 2000 there were 1081 offenders in prison from the 7th Judicial District and that number decreased to as low as 1011, rose to 1064 on July 1, 2003, and has decreased again to 1,058 as of July 1, 2004. Over approximately a four year time period the number of persons in prison from this District has decreased by 2.13% and over the same timeframe the entire prison population has increased by 9.68%. Although there are many factors that contribute to and affect this issue, it is indicative of the effort in this District to make wise use of the resources for incarceration and utilize alternatives whenever possible.

Drug Court

The Drug Court program experienced the first graduates from the program. Offenders in the drug court program are provided supervision and services as an alternative to prison commitment. Most offenders in the program would likely have been sent to prison if not allowed to participate in the Drug Court program. It takes each offender approximately 18 months to complete the program successfully. Unfortunately many do not succeed but are provided many opportunities for success.

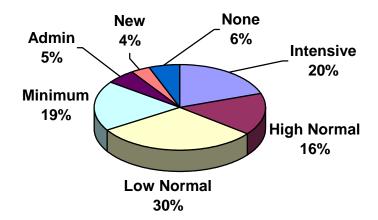

Budget Shortfalls and Staff Shortage

Budget shortfall due to reduced state support and funding has resulted in significant staff reductions for the Department. The Department has had to reduce staffing levels by over 10% since the start of FY 2001. At the same time as the reductions, the expectations of the Department have increased both by workload, services provided, and expected performance level. Staffing has been reduced in almost all areas and programs of the Department with residential and administration suffering significant reductions. The class of position which has been affected the most is the Secretary positions with almost 50% reduction in positions. Layoffs have been avoided by elimination of positions that have been vacated by normal attrition.

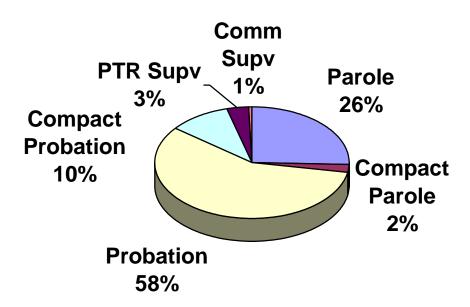

Key Statistical Information

The following information was obtained from the Criminal Justice Data Warehouse and ICON (Iowa Corrections Offender Network – offender database system used by District Departments and the Department of Corrections).

- ➤ **Restitution Collection:** Restitution information is not available for this fiscal year at this time. This Department discontinued collection of that information with plans for that data to be provided from the Data Warehouse with the use of Iowa Court Information System and ICON data.
- ➤ Pretrial Release Investigations: The Department completed 4,839 investigations of the 17,263 that were completed statewide. This represents an increase of almost 700 for this district and a smaller increase for the entire state. This Department completed 28% of the pretrial investigations conducted last year.
- ▶ **Presentence Investigations:** 907 investigations were completed by 7th District Department staff of the total 8,659 completed statewide. Investigations completed in this District were 8 less than the prior fiscal year but statewide the decrease was over 1,000. This District completed 10.5% of the investigations conducted in Iowa in FY04.
- ➤ Enrollment Fees for probation and parole supervision were collected from offenders in the amount of \$205,135 (increase of \$10,216 or 5%) that offsets the public expense to supervise offenders.
- Assessment and Reassessments: 1,851 LSI assessment and reassessments were completed. The LSI (Level of Services Inventory) is an assessment tool used by Department staff to assess and classify offenders for the purposes of case planning and risk management. The higher score represent a higher risk and need for supervision and services. 521 Jessness assessments were completed. Jessness Inventory is another assessment tool used as part of case planning and supervision. 3,532 Iowa Risk Assessments and Reassessments were completed. The Iowa Risk Assessment is used to determine the appropriate level of supervision and for workload and staffing purposes.
- ➤ Field Supervision Offenders: 1,778 offenders were on active field supervision on pretrial, probation, or parole supervision as of June 30, 2004. This is an increase of 97 and represents a 6% increase in the past fiscal year and represents a continuing trend of increased workload. Statewide there were 27,696 offenders under supervision. The level of supervision classification of offenders is shown graphically in the following chart. The Department provides a different level of supervision to different offenders based upon the risk of that offender. The "None" level represents offenders under supervised Pretrial Release who are not classified with the same system as probation and parole offenders.

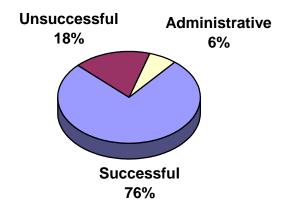

The supervision status of the offenders under supervision at the end of the fiscal year is shown below. Compact supervision is supervision transferred from another state to Iowa.

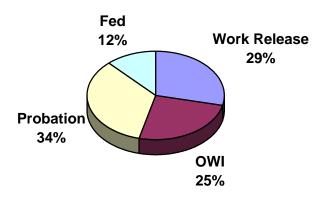

Fiscal Year 2004 Annual Report

The following chart represents the reason for closure for field supervision closures during FY04. Successful includes discharge from supervision, unsuccessful includes revocations due to technical violations or new crimes, and administrative includes amended charges, special court orders, and death.

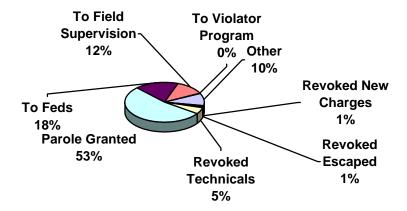

➤ **Residential Supervision:** 143 offenders were residents of either the Work Release Center or Residential Corrections Facility as of June 30, 2004. The two facilities have a combined capacity of 145. Statewide there were 1,459 residing in residential programs and the 7th District total represents 10% of the statewide total. The program breakdown of the 143 residents were: 41 on Work Release, 36 were in the OWI program, 49 as a condition of probation, and 17 were offenders placed by the Federal Bureau of Prisons.

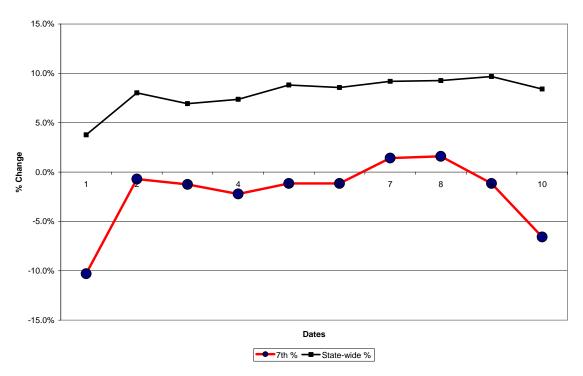

Fiscal Year 2004 Annual Report

The following graph represents the reasons for the 309 residential closures that occurred in FY04.

➤ Commitments to Prison: The following chart shows offenders in an Iowa prison from the 7th Judicial District and the total prison population over the same time period. While the state prison population has increased, the number of offenders in prison from this judicial district has decreased.

Percent Change in Prison Population from October 2000

The above chart shows the percentages of expenditures by cost allocation program that the Department utilizes.

The chart below indicates the change over the last 7 fiscal years in the relationship of state funding and non-state funding. Other sources of funds include grants, resident rent, offender enrollment fees, program fees, and miscellaneous.

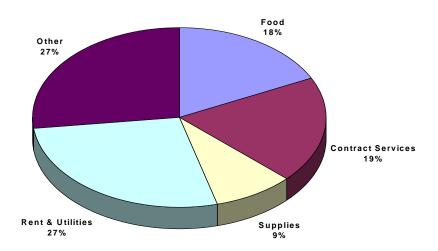

This charts below shows the percentage of costs comparison with personnel expenses (salary and benefits) versus non-personnel expenses and the major categories of non-personnel expenses.

Comparison of Personnel to Non-Personnel Expenses

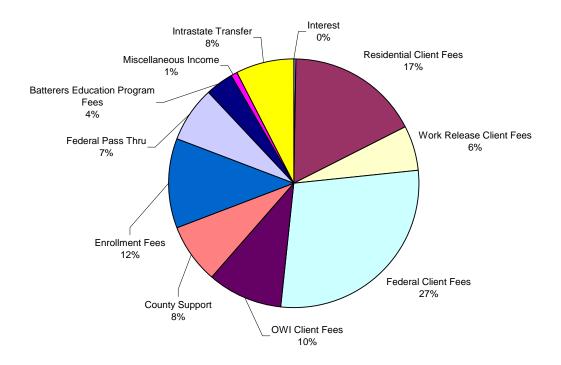

Non-Personnel Cost by Type FY 2004

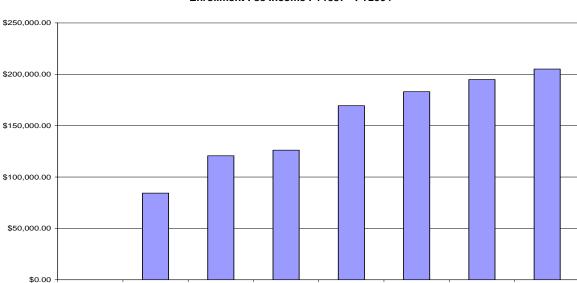

This chart below indicates the source of non-state appropriated funds expended by the Department in Fiscal Year 2004. As shown, the majority of the non-state funds are funds collected from offenders.

FY2004 Non-State Funds Expenditure by Source

The chart below shows the significant increase in enrollment fees paid by offenders placed on probation or parole since the fees was established by state law effective in FY98. The amount of the fee was also increased during that timeframe. Department employees make a concerted effort to collect enrollment fees since they are a significant factor in funding the Department's operations as state funding has been limited in the last few years.

Enrollment Fee Income FY1997 - FY2004

The chart below shows the significant increase in rent paid by residents and paid by the Federal Bureau of Prisons for residential services for federal offenders. This represents the increasing cost of operations paid for by the residents and the increased income from the BOP which reduces beds available for state corrections system offenders.
